The creators of “A Cheyenne Odyssey” have designed the game and accompanying classroom materials for educators and students to use in a variety of ways. The game’s flexible format allows for use in the classroom, at home, in the library or media center, or wherever there is a computer with an Internet connection. The game can be played in a one-computer classroom, a multiple-computer classroom, or in a lab setting. Students playing the game can work alone, in pairs, or in groups. Educators using the game can decide just how much classroom time they wish to dedicate to gameplay, in-class activities, and accompanying assignments.

Your students will gain the most from “A Cheyenne Odyssey” if their gameplay experiences are supported by classroom activities, discussions, and writing exercises guided by your teaching expertise. The MISSION US website provides a wealth of materials to connect the game to your own goals and objectives related to teaching about “westward expansion” topics.

This document provides you with some planning questions to help you map out your classroom implementation of “A Cheyenne Odyssey,” as well as three different “models” for low, medium, and high utilization of the game and the accompanying materials.
The Test of Time
If a student were to sit down at a computer and play “A Cheyenne Odyssey” from beginning to end without stopping, the entire gameplay experience would take approximately 90 minutes. However, we do NOT suggest you use this approach with students. The game is divided into five separate “parts” (think of them as chapters in a historical novel). Your students’ learning will be maximized if you take the time to use the gameplay as a “point of departure” or inspiration for classroom instruction.

As a first step: Play the game yourself and briefly review the available curricular materials that accompany “A Cheyenne Odyssey” on the MISSION US website. Think about how much classroom time you usually dedicate to the events and concepts presented in the game. What other curricular goals do the game and accompanying materials support? What are the dominant themes of your social studies instruction (vocabulary, writing and reaction, social issues, analysis of primary source documents)?

*Make a rough estimate of how much classroom time you’d like to dedicate to “A Cheyenne Odyssey.”

Location, Location, Location
As mentioned above, “A Cheyenne Odyssey” can be played in a variety of settings with a variety of technology set-ups. Your students can play as a class, in small groups, in pairs, individually, or you can mix and match these approaches. Depending on accessibility of technology, students can play in class, at home, or both – since their online accounts will save their game data wherever they play, and allow them to continue playing in any setting where a computer with an Internet connection is available.

As a second step: Consider the technology available to you and your students. Do you want to play the game entirely in class? Assign some sections as homework? Split student play between in-class and at home? Ask your students to play the game entirely at home, and dedicate class time to activities?

*Determine how and where you and your students will play the different sections of the game.

Classroom Activities, Discussion, and Reflection
The classroom activities accompanying “A Cheyenne Odyssey” on the MISSION US website offer an extensive set of resources to support instruction. The activities roughly fall into four broad categories:
Other activities and resources provide additional primary sources, background information on the characters and setting, historical essays, and printable artwork from the game.

*Create a preliminary list of the activities you and your students will complete during your use of “A Cheyenne Odyssey.”

**Planning**
Because of their flexibility, teachers may opt for low, medium, or high integration of the game and its accompanying materials. There is no “right” or “wrong” way to use “A Cheyenne Odyssey.” Below are some ideas on what the different levels of integration might look like in a classroom.

**“High” Integration (using the game as context for classroom learning)**
*Estimated Number of 45-minute class periods: 8-10 (excluding homework time)*
- Students play the different parts of “A Cheyenne Odyssey” in the classroom or computer lab, individually or in pairs.
- Before, during, and after playing each part of the game, students process what they are doing through discussion, writing, and other activities facilitated by the teacher.

A teacher working in this mode might begin a class by asking students to share what they learned in the prior part of the game about the main characters, what the keywords for the day mean, or what they predict will happen in the episode they are about to play.
During game play, the teacher might walk around and look over students’ shoulders, asking them to explain a choice they’ve made, and perhaps pose a question to the room – “Who decided to go searching for the horses?” or “Why does Little Fox want to become a member of a warrior society?”

Right after game play and/or for homework, the teacher would engage students in one of the follow-up activities available on the MISSION US website – discussion and writing prompts, vocabulary exercises, primary source analyses, or reviewing change and continuity– all of which deepen students’ understanding of the period by connecting game experiences to more formal curriculum knowledge and skills. Students might end the unit by making presentations, drawings, writing, or completing other multimedia projects.

Medium Integration (using the game as a supplement to classroom learning)

Estimated number of 45-minute class periods: 5 (excluding homework time)

- Students split gameplay between the classroom or lab, and as homework
- Gameplay is complemented with in-class and homework activities, in which students write and talk about what is happening in the game, using materials from the website.
- Gameplay alternates with non-game-related classwork.

A teacher working in this mode might introduce students to the game via a class playing of Part 1 on a Friday afternoon, and asking students to play Part 2 for weekend homework.

A portion of the following Monday’s class period would focus on student reactions and thoughts about the game, as well as a brief vocabulary activity. Students would be asked to play Part 3 of the game before class on Tuesday.

In Tuesday’s class, students would complete a document-based activity related to Part 1, 2, or 3 of the game.

In Wednesday’s class, students would be assigned to play Part 4 and respond to a writing prompt or review questions as homework.

In Thursday’s class, students would play Part 5, and complete one of the activities related to those portions of the game in class.
In Friday’s class, students would review terms, phrases, and events from “A Cheyenne Odyssey” and be assigned to respond to a writing prompt or review questions as homework.

**Low Integration (using the game as an extra or enhancement)**

*Estimated number of 45-minute class periods: 1 total (excluding homework time)*

- Teacher introduces the game to students (perhaps using a projector), and assigns students to play the entire game as homework, giving students several days to complete the task.
- Teacher assigns one or two of the “A Cheyenne Odyssey” writing activities to students for homework, and/or holds a class discussion about the events in the game, connecting those events to what students are learning about through traditional study.
